Hi, and welcome to Earls Colne Airfield. The home of **Anglian Flight Centres (AFC)** and **Anglian War birds (AWB)**. We are a flight training school and air experiences organisation based near Chelmsford and only 60 minutes' drive from London.

Here at **AFC** we offer a modern approach to flight training so as provide Private Pilot Licence (PPL) students and licence holders an up to date training and advanced training service. Our fleet of 2 seat Robin aircrafts and 4 seat Cessna 172 aircraft allow our instructors to deliver a value for money all year round training schedule on our all-weather grass and tarmac runways. For those bad weather days, students and pilots can opt to carry out training or practice flights in our flight simulator

Our sister company **AWB**, based at the Airfield is for those people who want a little more excitement with their flying. We offer flight training and air experience flights in our 1942 ATC Harvard IIA, our DH82A Tiger Moth or our Piper Super cub. All these aircrafts are operated by experienced display pilots.

*Our 1942 AT6 Harvard IIA, genuine fighter trainer from WW2. Used by the RAF, South African and Portuguese air forces as and advanced fighter trainer*

*The Tiger Moth DH82A, used for fighter pilot initial training in WW2*

*One of our five Robin HR200 training used to teach students to fly, and for private hire once you have your PPL*

*The full cockpit flight simulator with wrap around screens to give you the full sensation of flying without ever leaving the ground*
